The making of Transparent Soap From Green Tea Extract Tuty Anggraini, Sahadi Didi Ismanto and Dahlia Faculty of Agricultural Technology, Andalas University, 25163 West Sumatra, Indonesia

The making of Transparent Soap From Green Tea Extract

Transparent soap is basically partly soap and partly solvent. Sodium Hydroxide causes crystals to form in soap and that is why the soap becomes opaque, in order to make it transparent, you have to dissolve the soap in enough solvent to make the crystals so small that the the light will freely pass through the soap, which makes it look transparent. There is no magic number when it comes to the quantity of solvents required for a particular recipe, transparency will exist in a narrow window ...

Making Transparent Soap - Bearchele

formulation of transparent melt and pour soaps. The industry definition of transparent soap is the soap must be transparent enough to read 14-point Times New Roman font through a quarter inch thick piece of the soap. As explained by Evans, in making a bar of transparent soap it is necessary to figure closely, or,

Formulation of Transparent Melt and Pour Soaps Without

First-year and organic chemistry students will learn the chemistry of soap by making some of the eleven described formulations, which produce usable, quality bars of soap. Opaque and transparent soaps are made in two and three hours, respectively. With an introduction to formulation chemistry, organic chemistry students can devise a formulation ...

Making Usable, Quality Opaque or Transparent Soap

Download PDF 5529714 PDF help. US Patent References: 5417876 ... The traditional method for making transparent soap involves forming a solution of ingredients in a volatile solvent (commonly ethanol), casting the pourable mixture into large mold frames and allowing the volatile solvent to evaporate. Solidified soap is semi-opaque when initially cast. Solvent evaporation creates the transparent ...
