

therapeutic peptides and proteins pdf

1. Introduction: The evolution of peptide therapeutics. Peptides represent a unique class of pharmaceutical compounds, molecularly poised between small molecules and proteins, yet biochemically and therapeutically distinct from both.

Therapeutic peptides: Historical perspectives, current

1. Introduction. Proteins and peptides are the building blocks of life and are now evolving as a very promising brand of therapeutic entities. Once a rarely used subset of medical treatments, therapeutic proteins have increased dramatically in number and frequency of use since the introduction of first recombinant protein therapeutic viz. human ...

Introduction. High-level production of recombinant proteins as a prerequisite for subsequent purification has become a standard technique. Important applications of recombinant proteins are: (1) immunization, (2) biochemical studies, (3) three-dimensional analysis of the protein, and (4) biotechnological and therapeutic use.
